

UK based family business manufacturing superior quality tubular furniture for the hospitality, office hotel and educational markets. We specialise in folding tables made both in aluminium and steel made to exacting standards in our factory in the UK, with high tech machinery using the latest technology and advanced materials.

Extensive market research has been a major deciding factor in the design of our product line up. Considerations to Health and Safety, stress, fatigue, frustration in operation and the handling of frequently moved tables is important to both the organisation and the user. To this end our Easylift Lightweight Aluminium table leads the field, not only is it the most advanced and easiest to use, it is the lightest around.

Our Patented spring loaded folding leg mechanism first seen on Easylift now features on our Banqueting and Utility steel ranges – making the folding operation much faster and simpler.

All tables are engineered to endure the heavy use the hospitality and educational environments demand. Transportation storage / trolleys compliment the portfolio to assist the user.

We are confident that you will be impressed and pleased with the Quality, Performance and Durability our tables will give you over the next few years.
